

Theranostics

The Forum for Diagnostics, Imaging, and Therapy Research

Front Cover:

Major vault protein (MVP) negatively regulates osteoclastogenesis via calcineurin-NFATc1 pathway inhibition

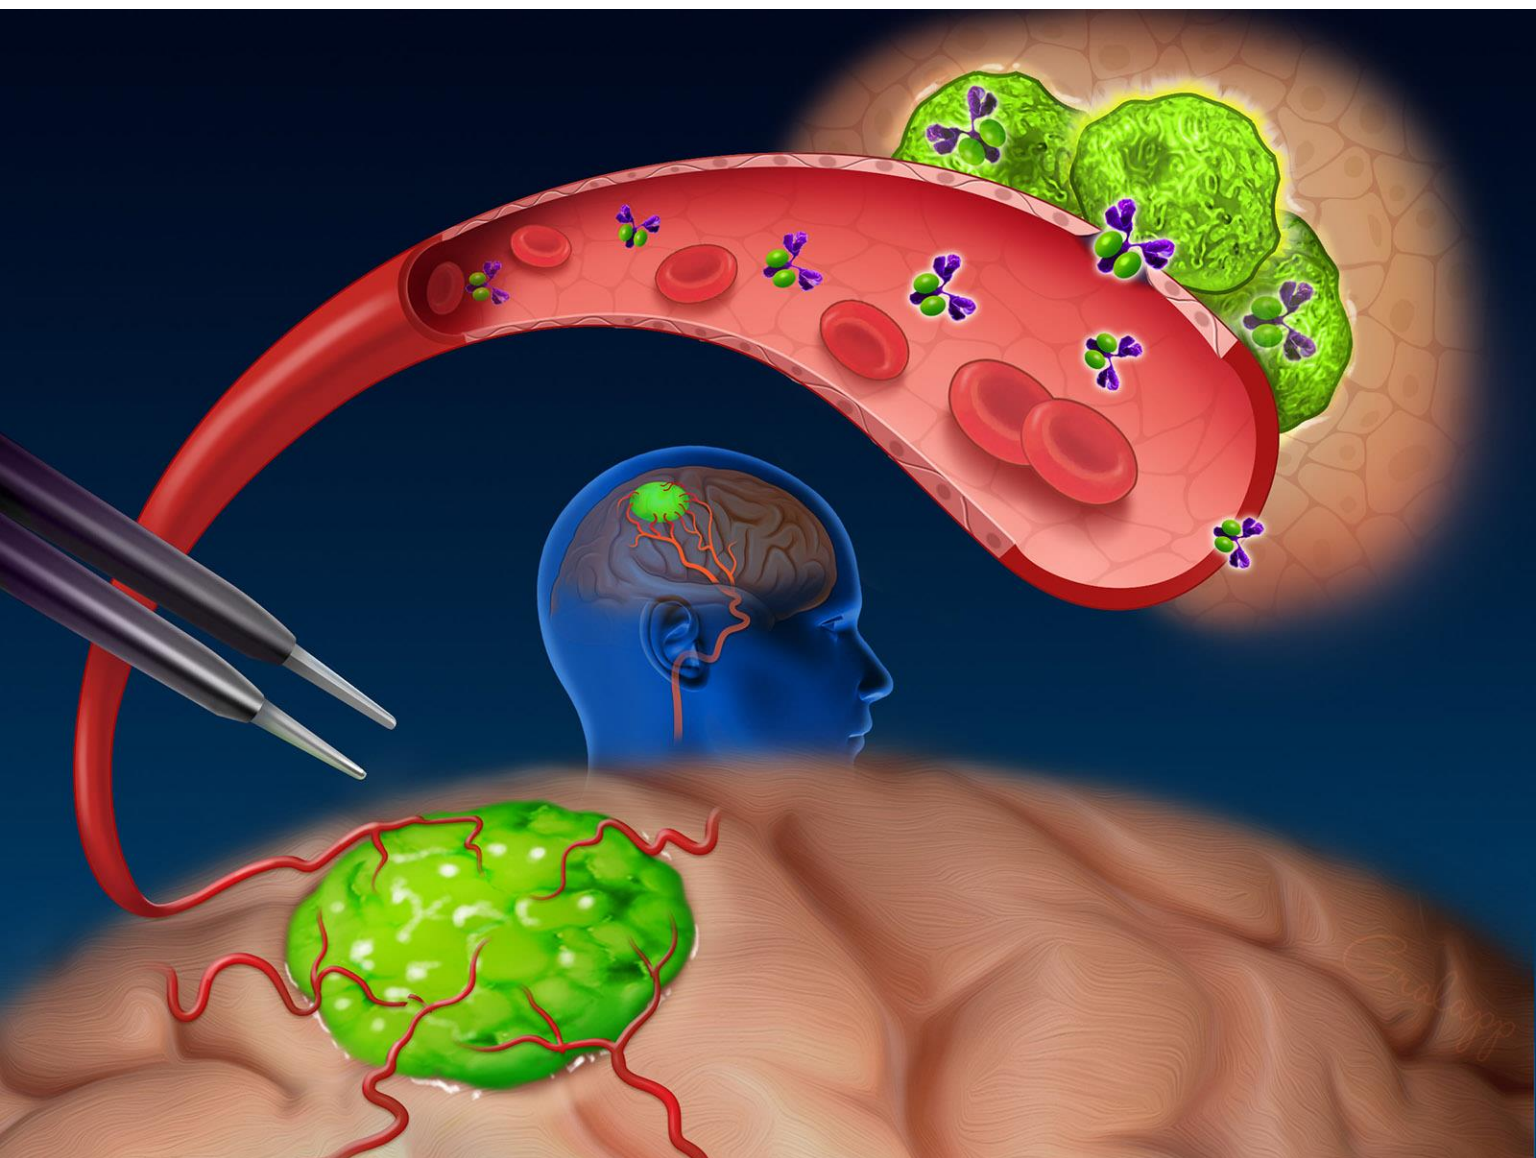

L. Yuan et al. pp.7247

IVYSPRING
INTERNATIONAL PUBLISHER

Theranostics

The Forum for Diagnostics, Imaging, and Therapy Research

Inside Front Cover:

EGFR-targeted intraoperative fluorescence imaging detects high-grade glioma with panitumumab-IRDye800 in a phase 1 clinical trial

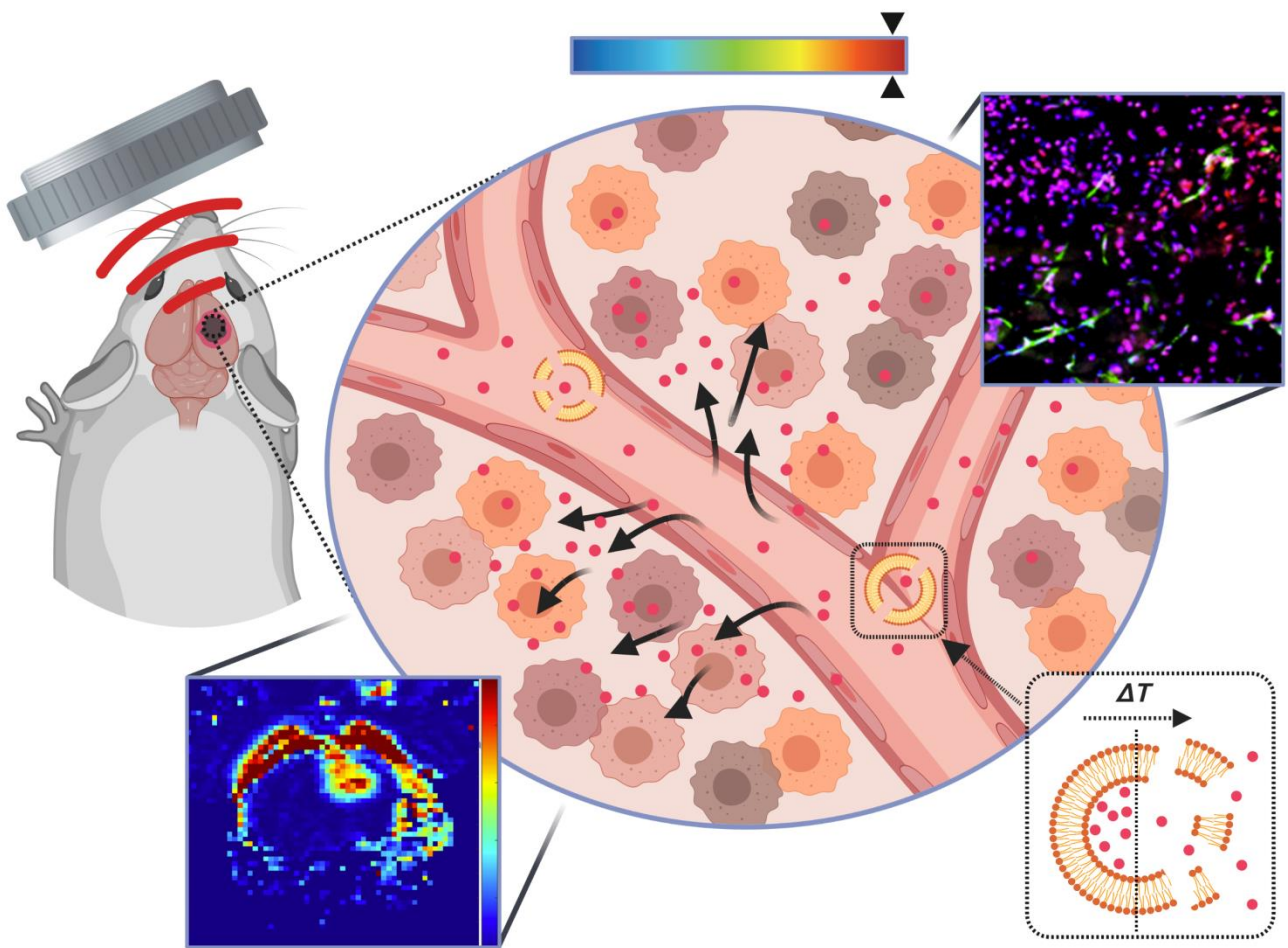

Q. Zhou et al. pp.7130

Theranostics

The Forum for Diagnostics, Imaging, and Therapy Research

Inside Back Cover:

Closed-loop trans-skull ultrasound hyperthermia leads to improved drug delivery from thermosensitive drugs and promotes changes in vascular transport dynamics in brain tumors

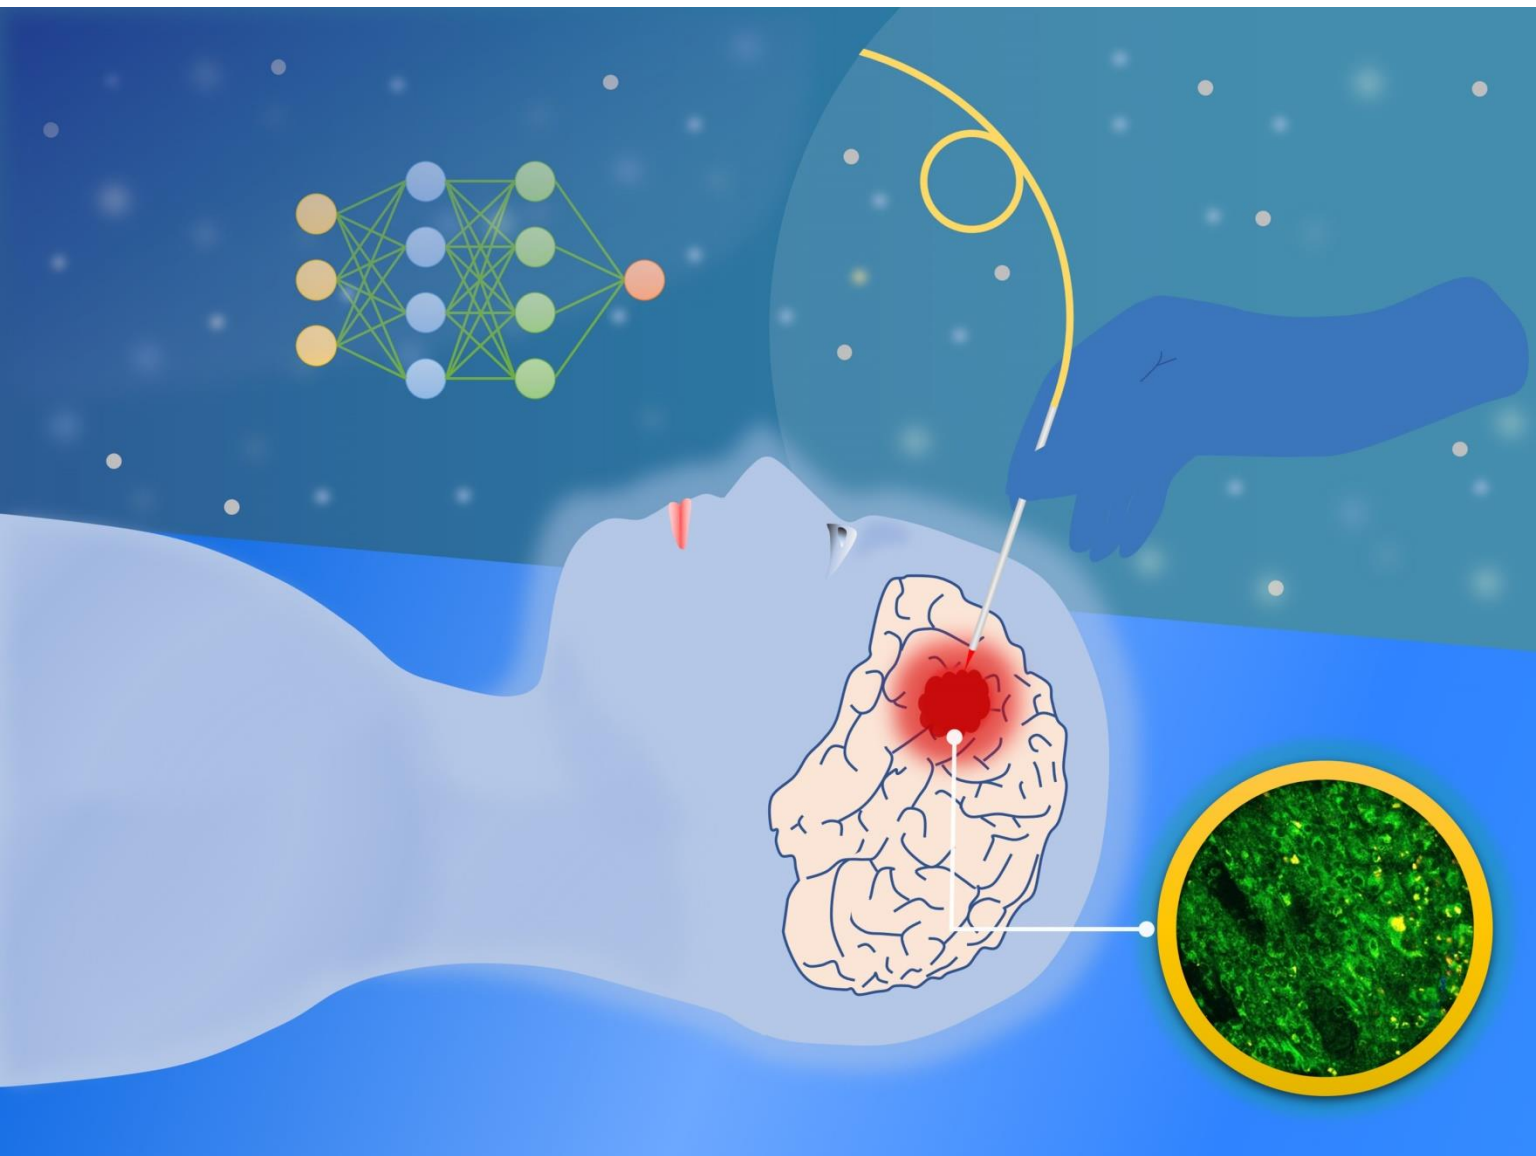

C. Kim et al. pp.7276

IVYSPRING
INTERNATIONAL PUBLISHER

Theranostics

The Forum for Diagnostics, Imaging, and Therapy Research

Back Cover:

Label-free imaging of human brain tissue at subcellular resolution for potential rapid intra-operative assessment of glioma surgery

D. Chen et al. pp.7222
