

Supplementary Information

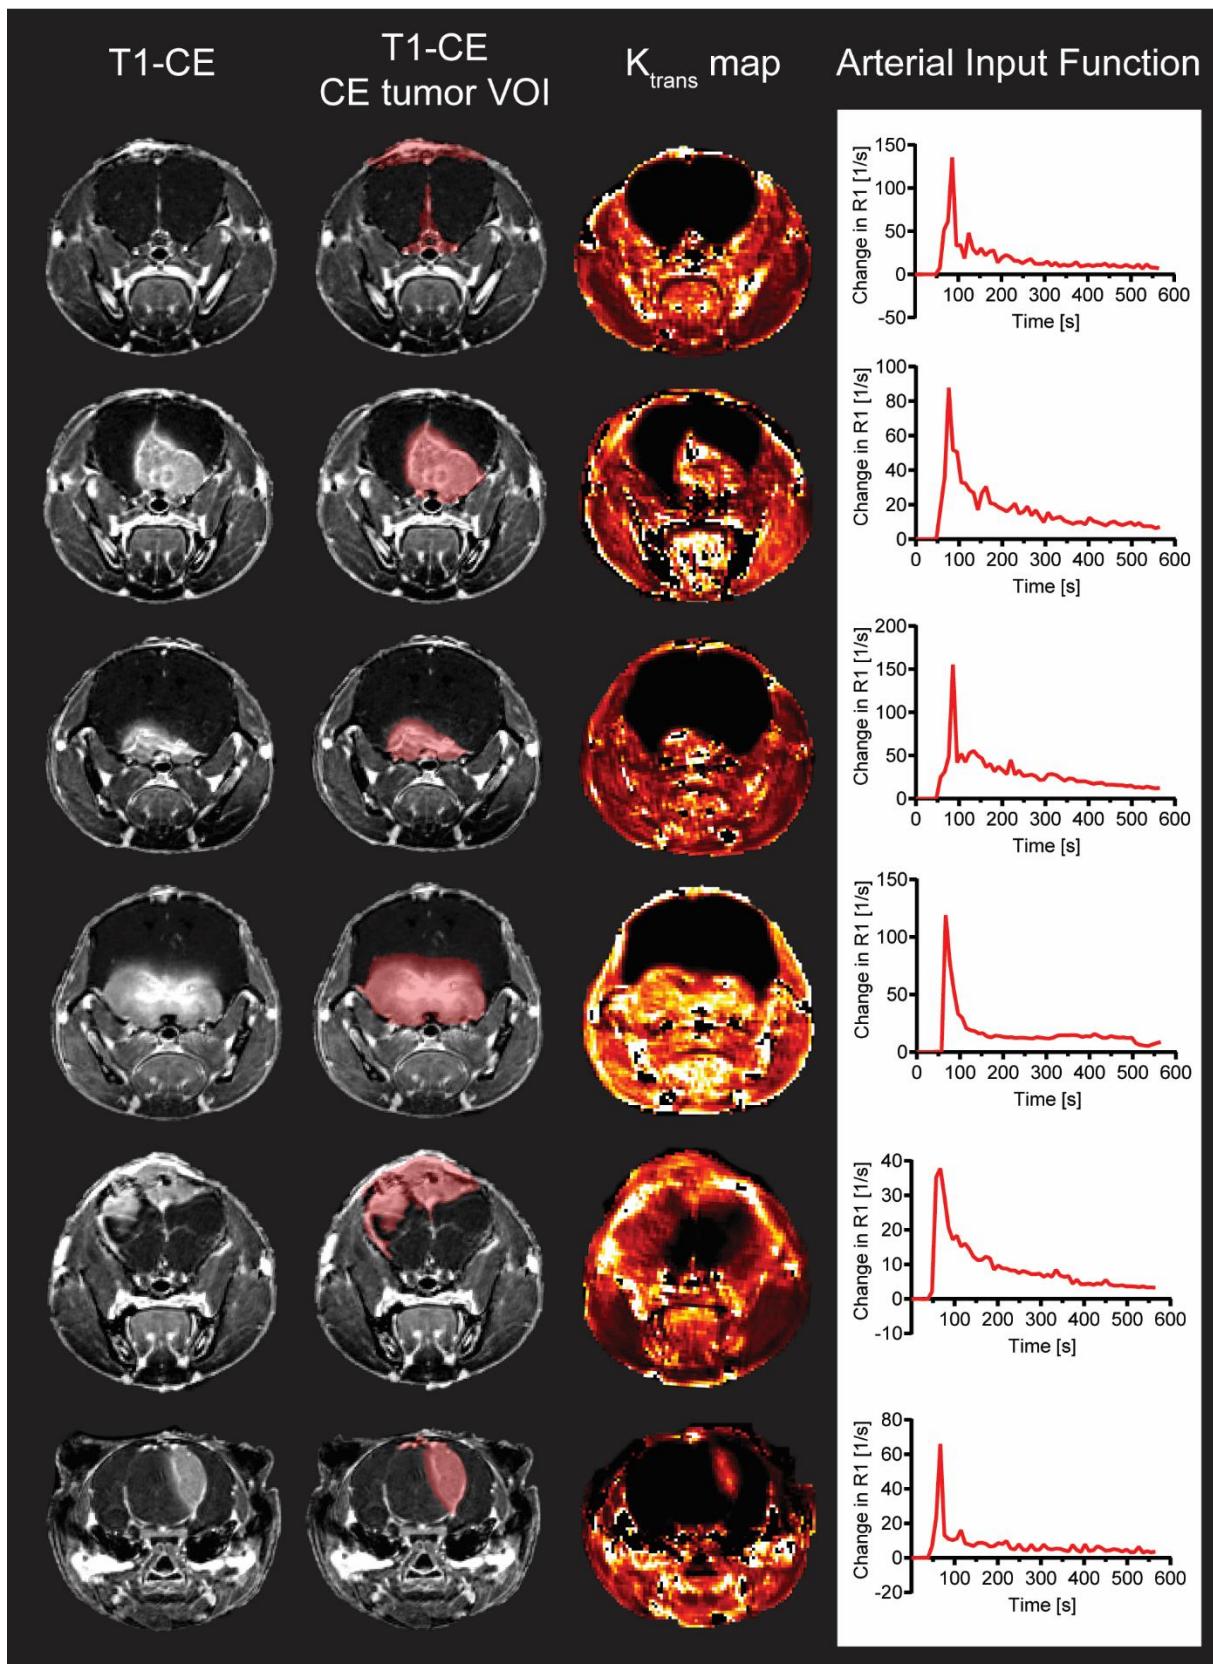

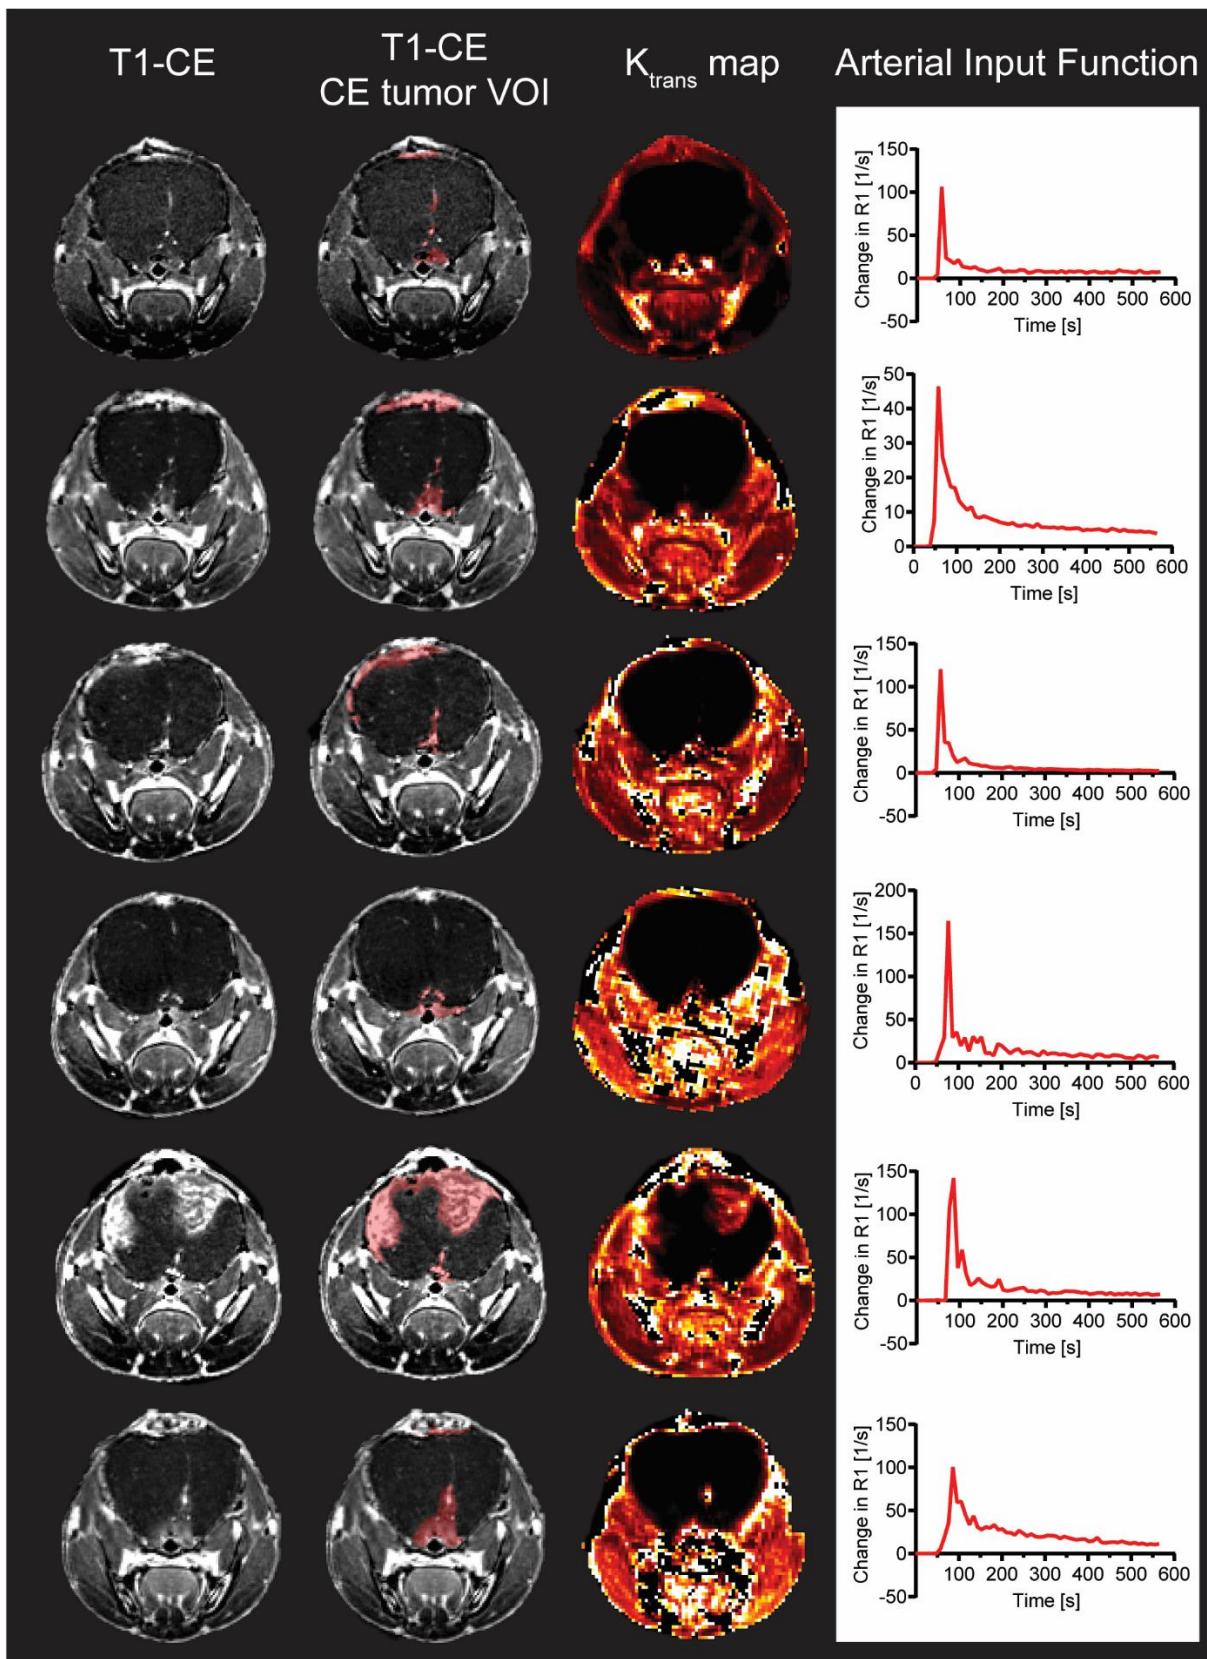

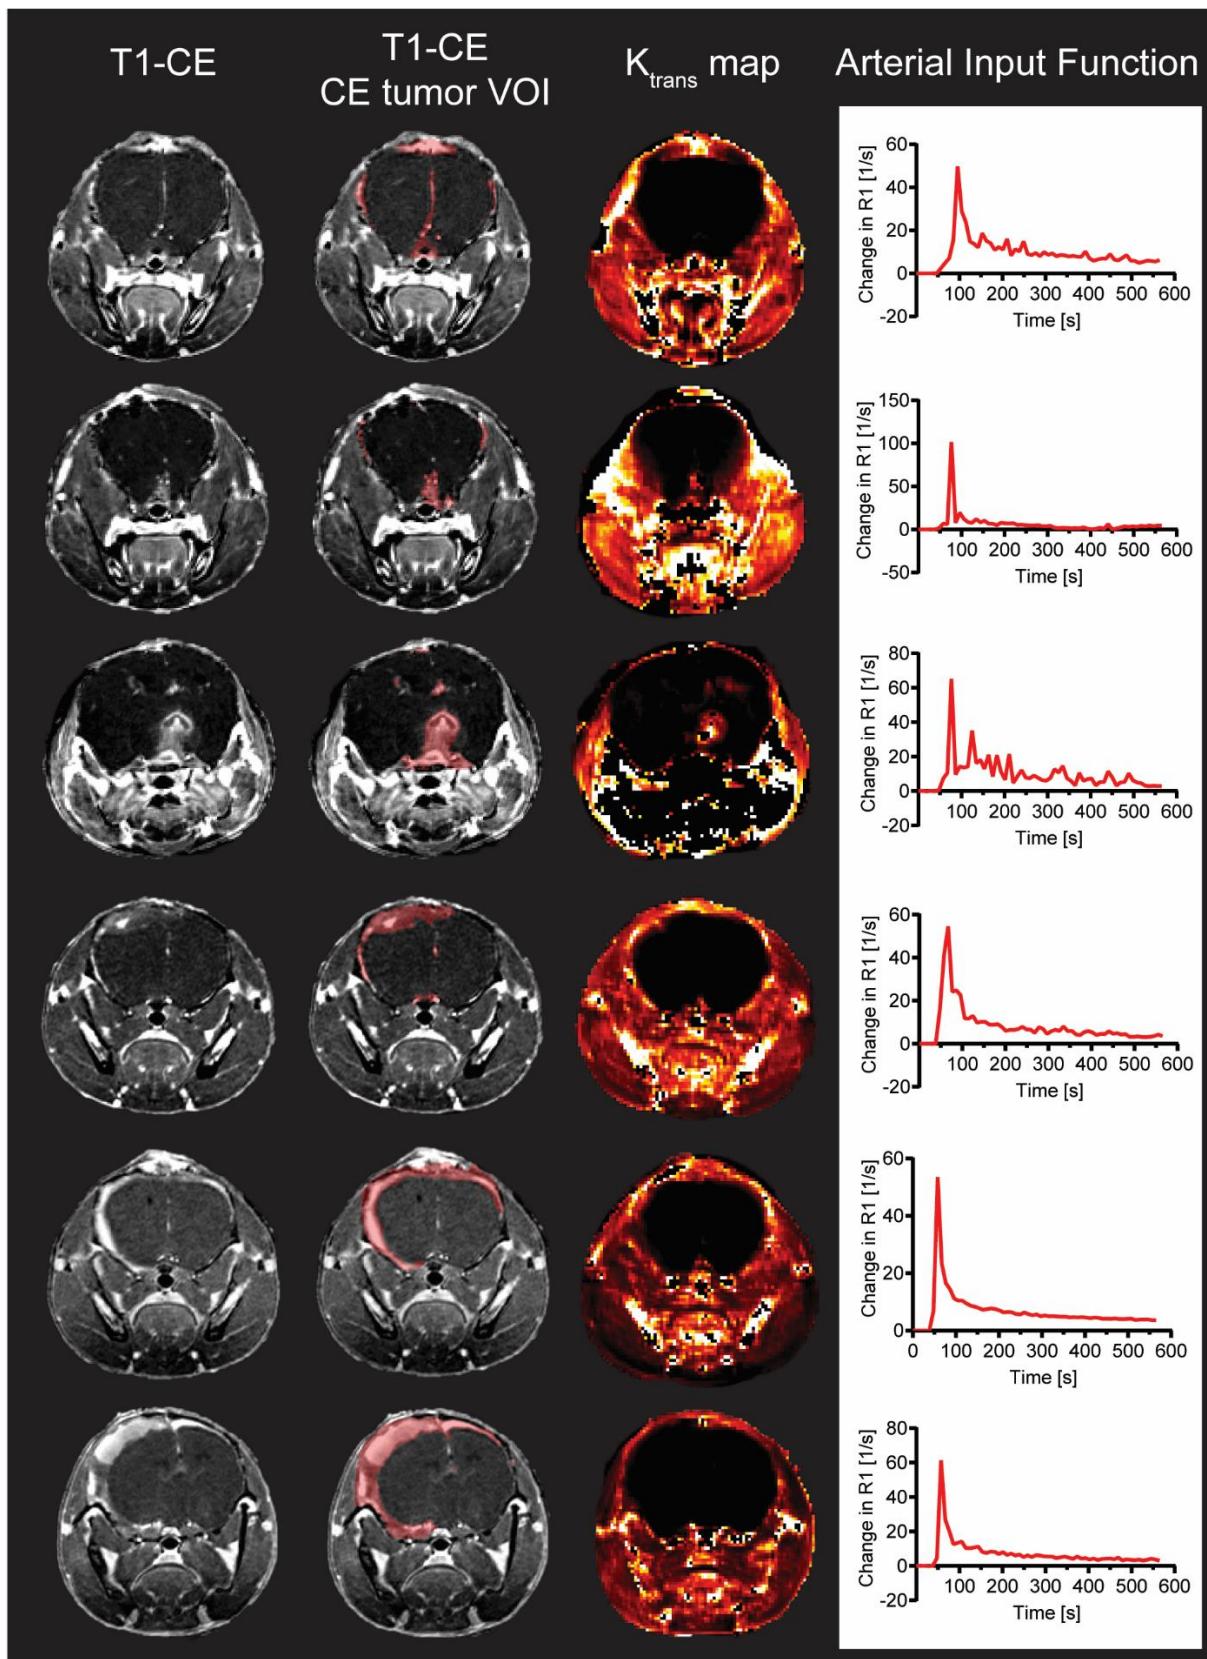

Figure S1. DCE MRI modelling for K_{trans} maps generation in U87 mouse model. L-R: T1-CE, T1-CE with defined CE tumor VOI (red), K_{trans} map generated from kinetic modelling of DCE MRI data and arterial input function (AIF) selected for the generation for the K_{trans} map.

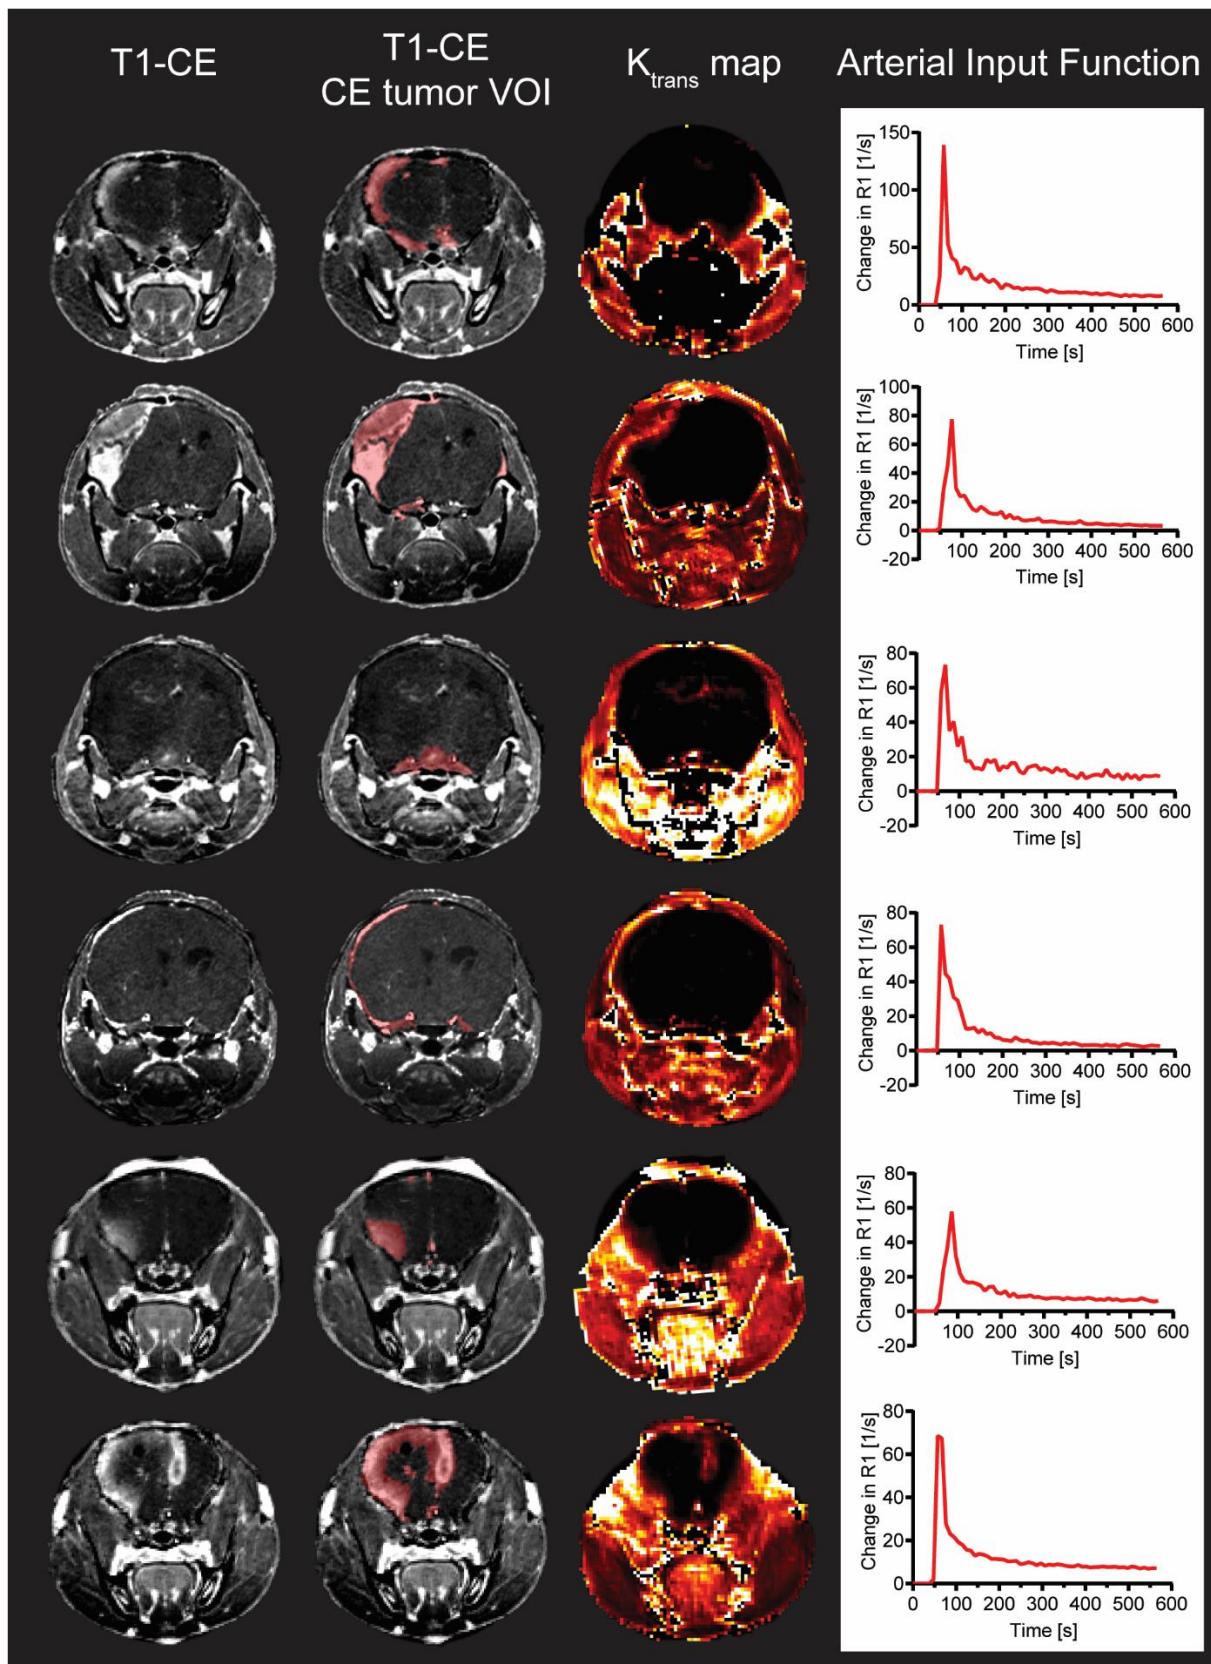

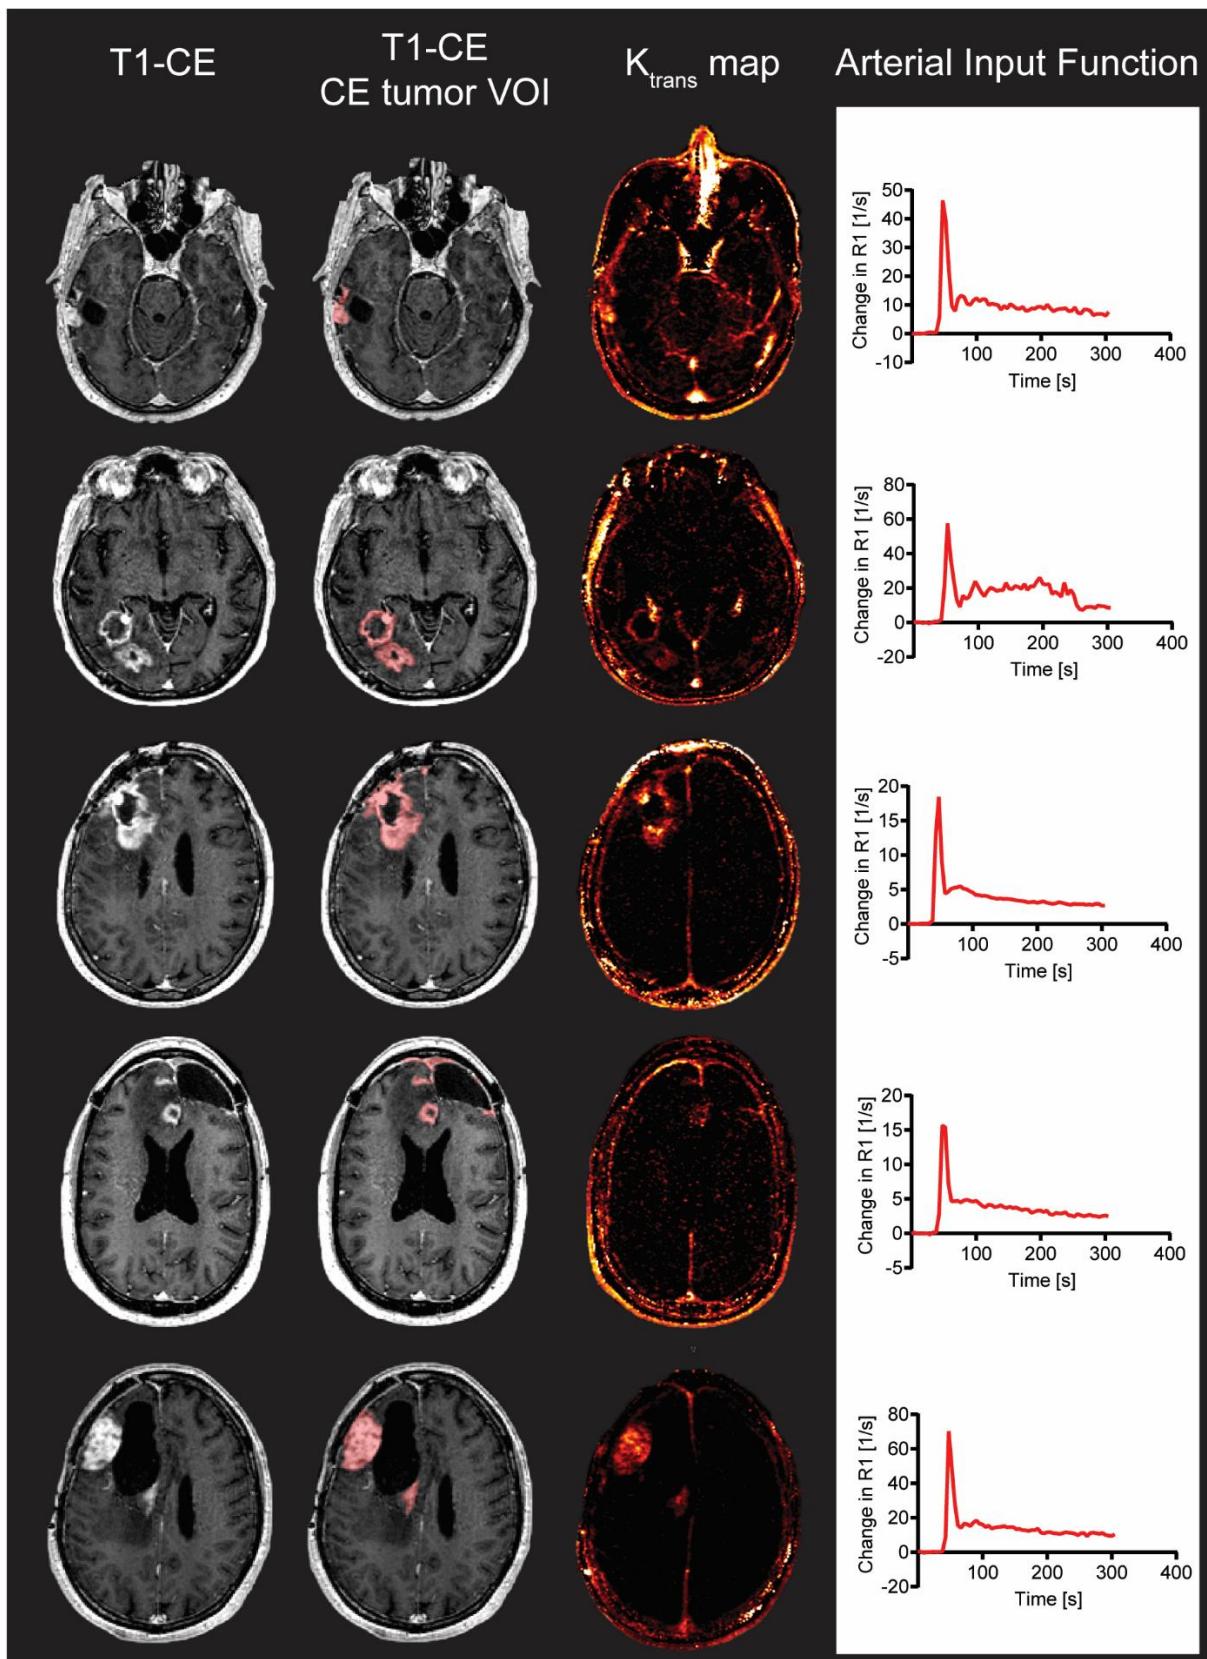

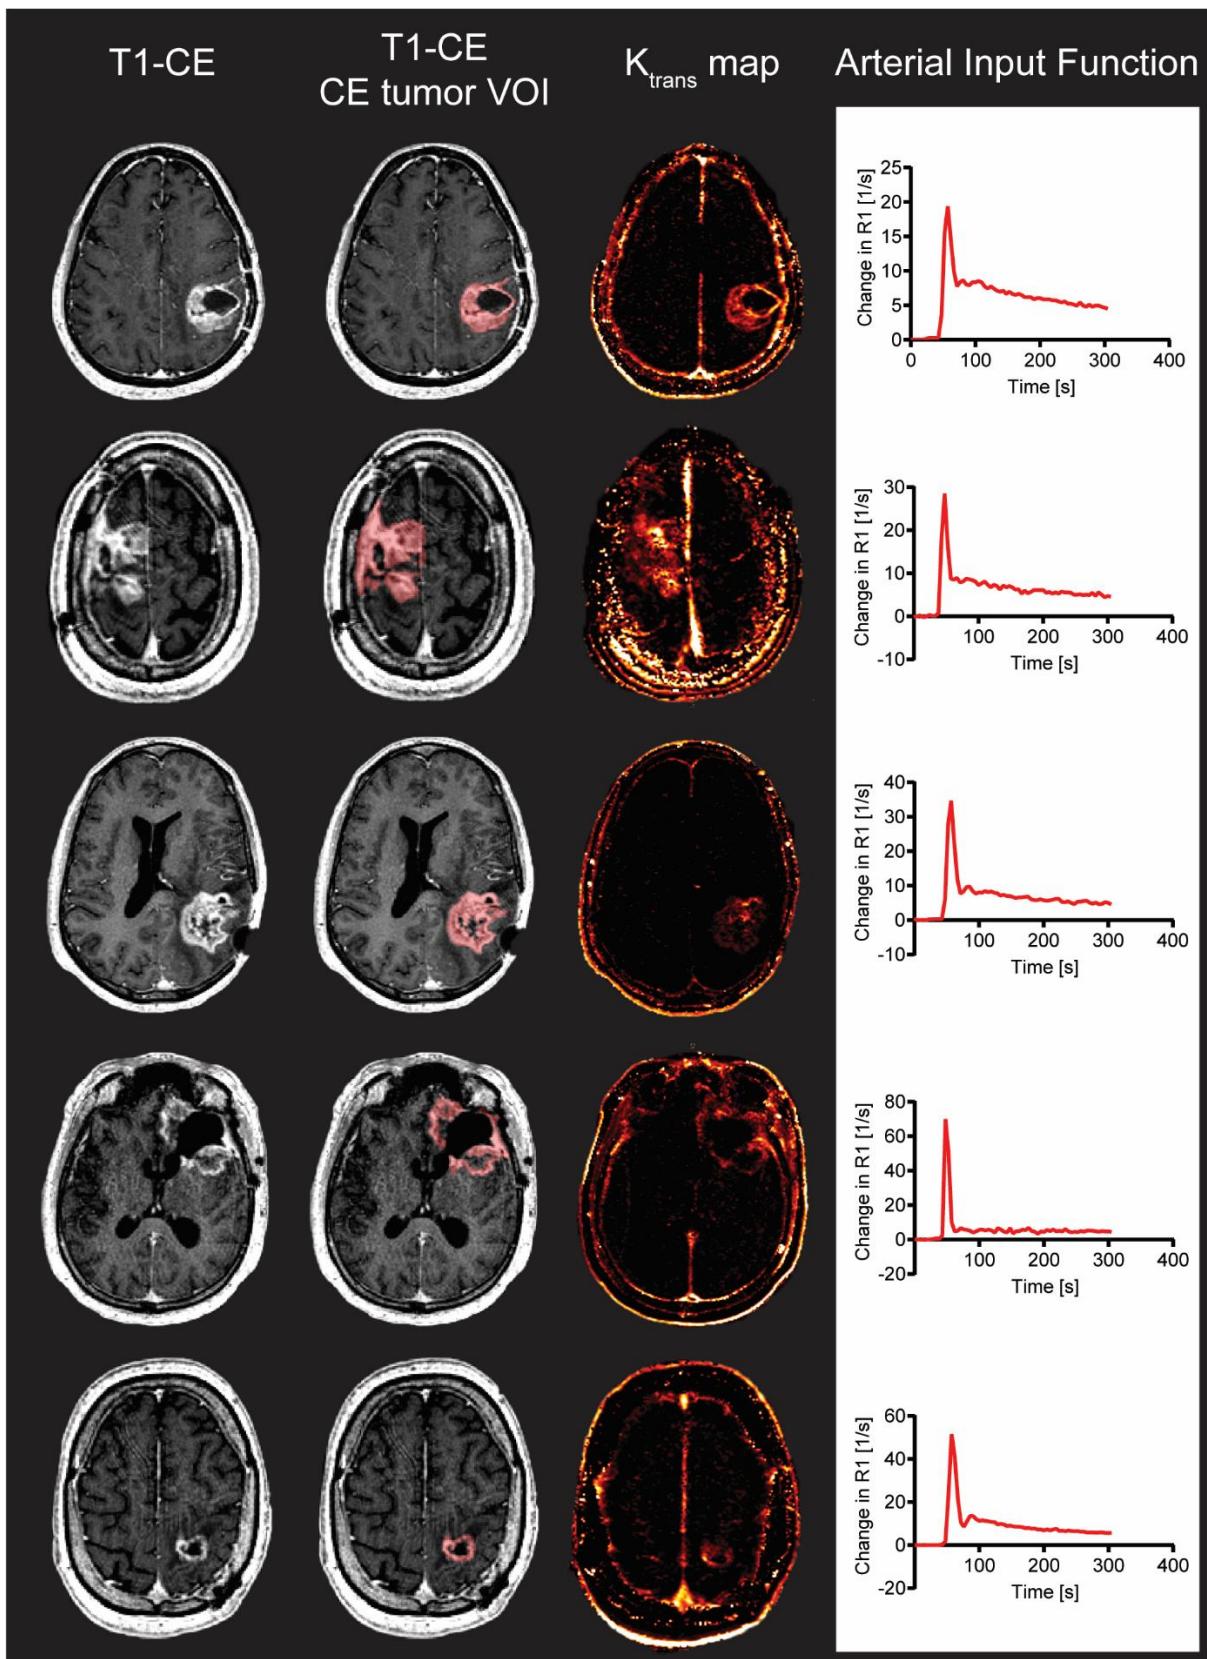

Figure S2. DCE MRI modelling for K_{trans} maps generation in WK1 mouse model. L-R: T1-CE, T1-CE with defined CE tumor VOI (red), K_{trans} map generated from kinetic modelling of DCE MRI data and arterial input function (AIF) selected for the generation for the K_{trans} map.

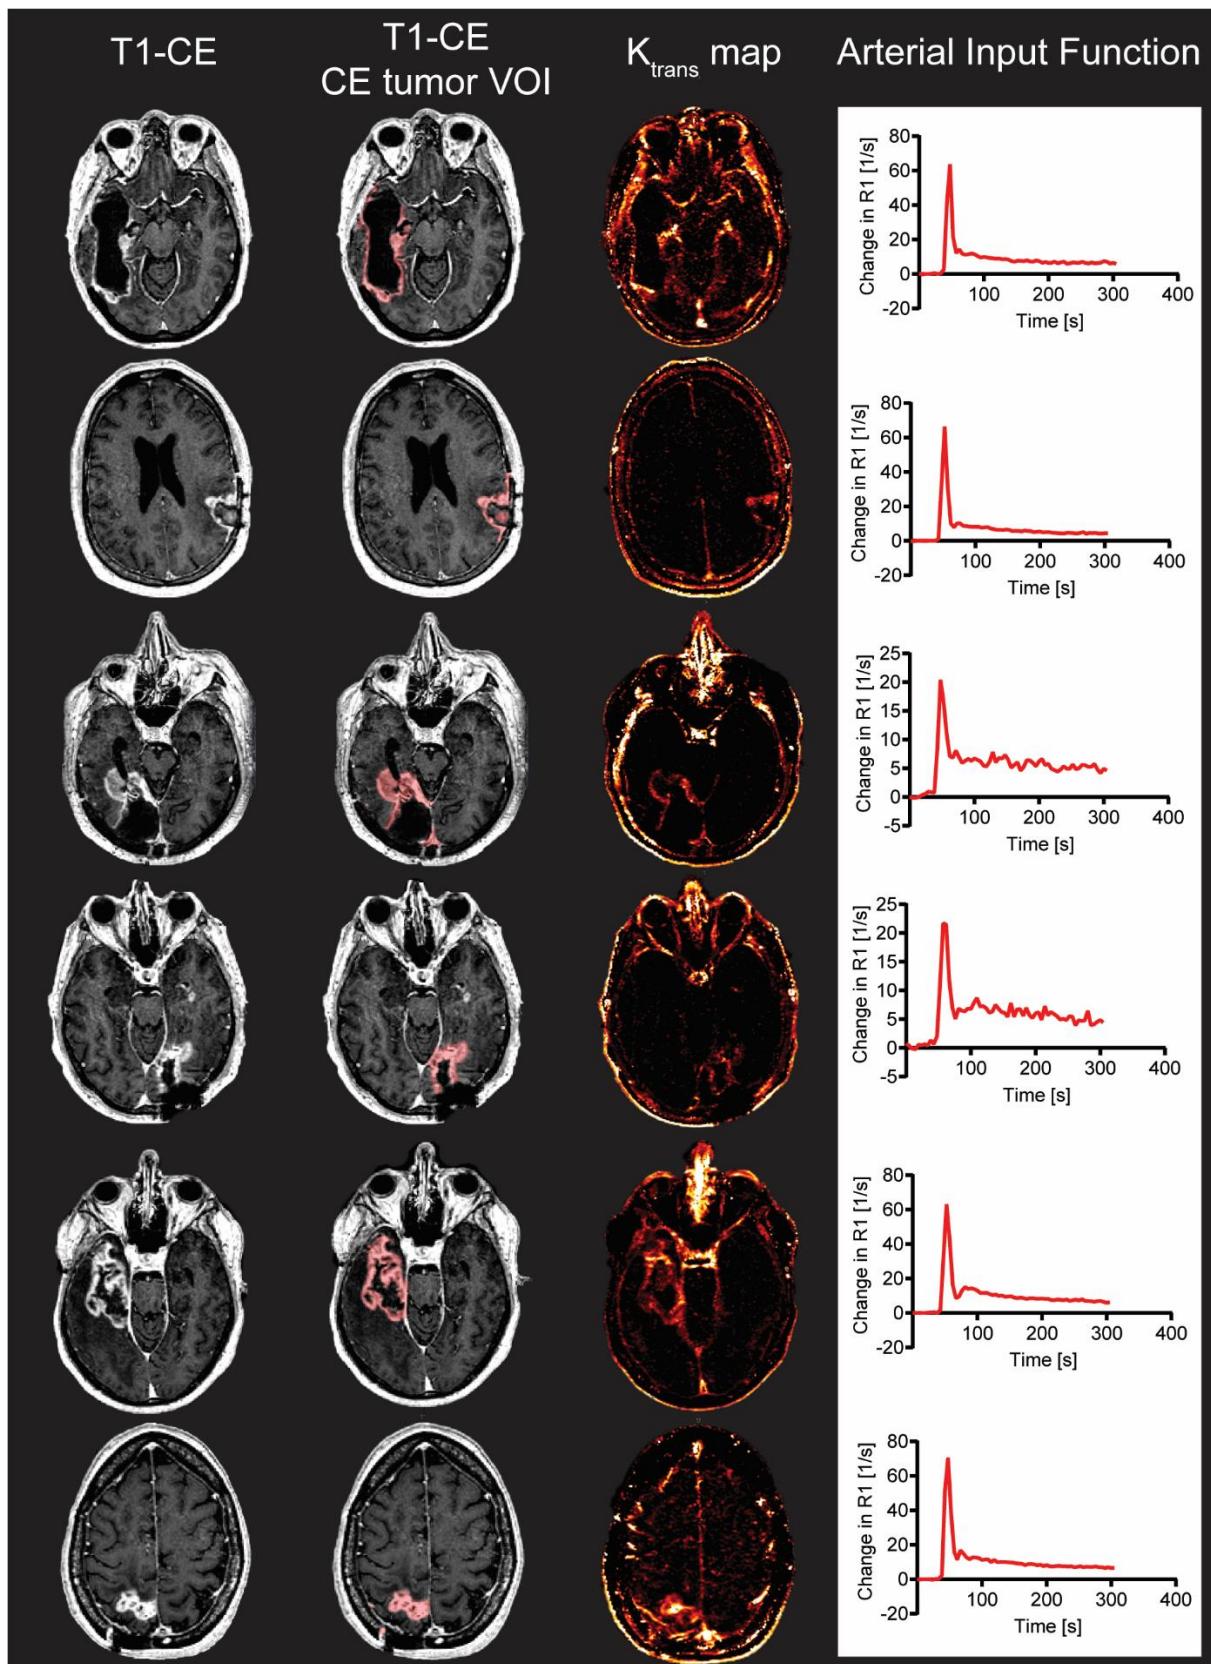

Figure S3. DCE MRI modelling for K_{trans} maps generation in patient rHGG. L-R: T1-CE, T1-CE with defined CE tumor VOI (red), K_{trans} map generated from kinetic modelling of DCE MRI data and arterial input function (AIF) selected for the generation for the K_{trans} map.

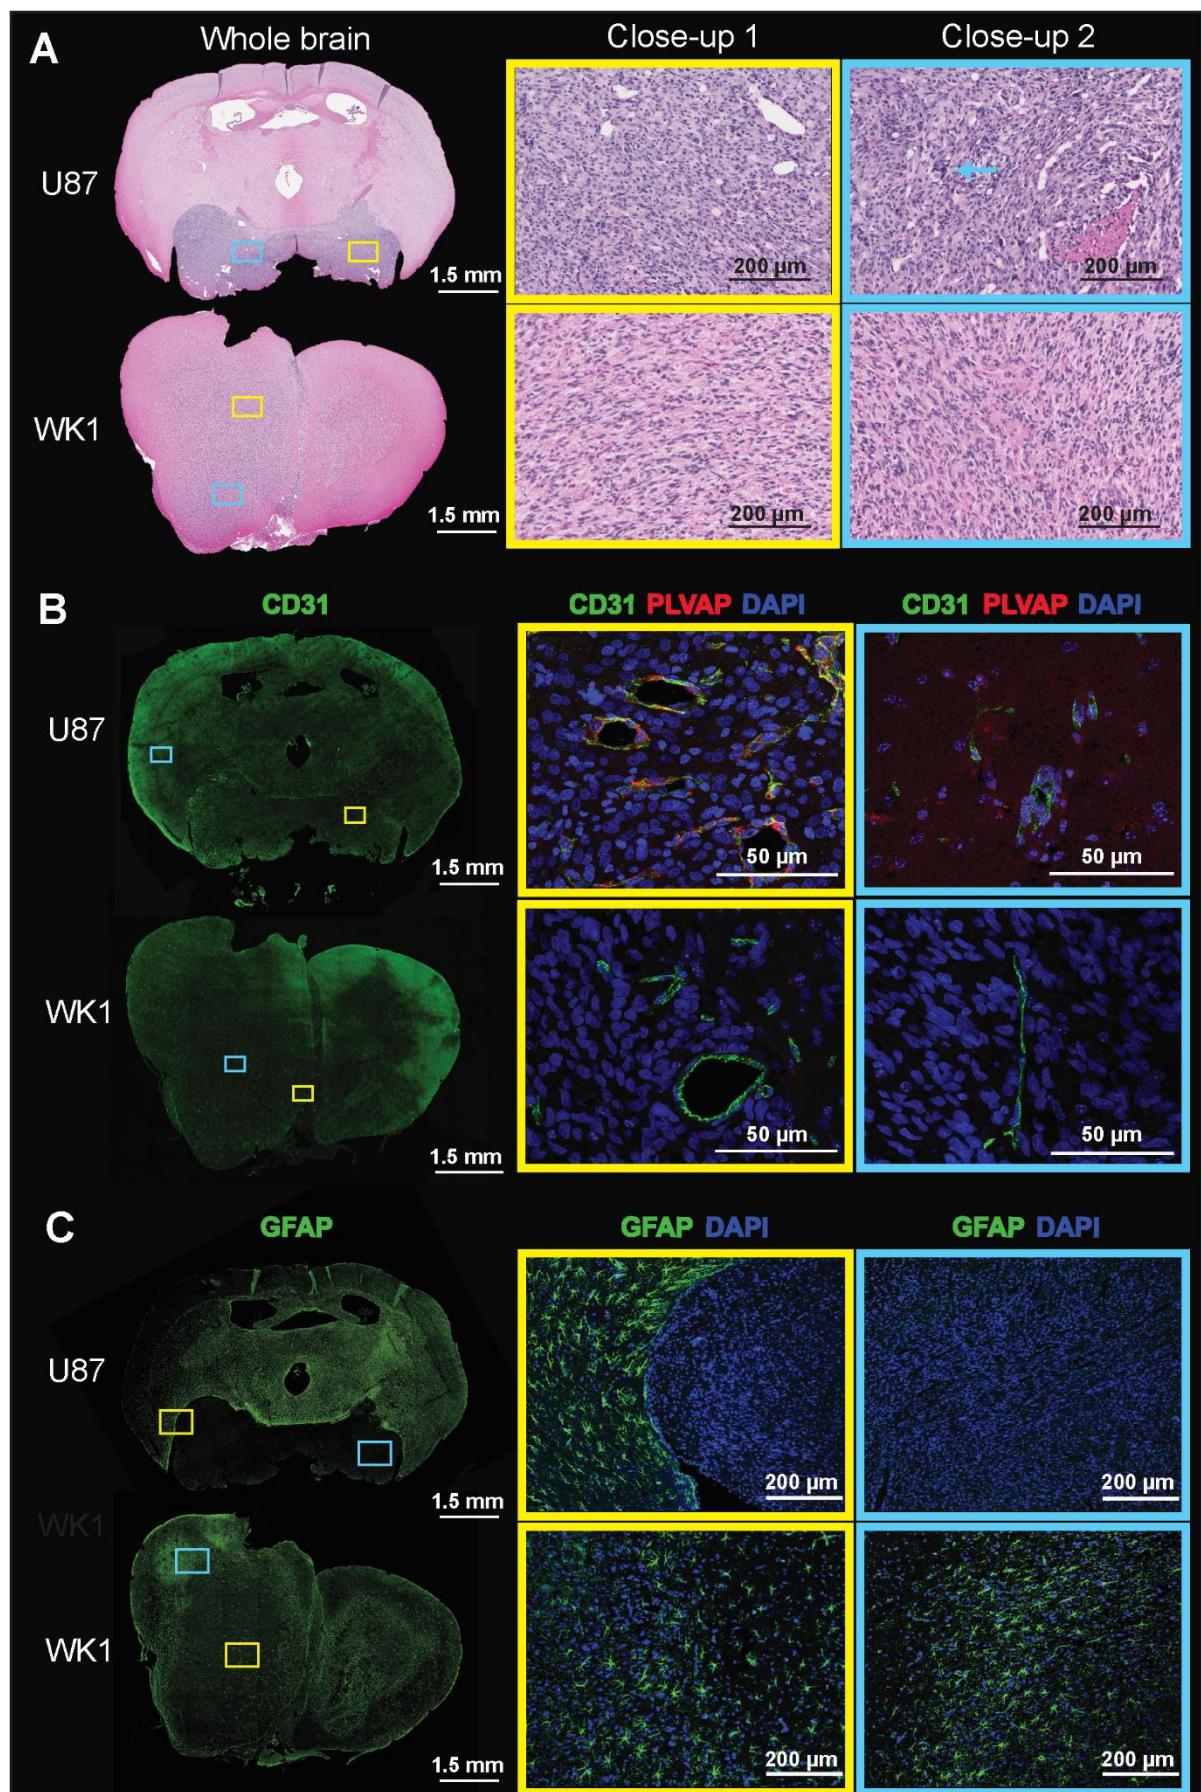

Figure S4. Additional images of H&E and immunofluorescence stained brain sections. The images show **A.** H&E, **B.** CD31/PLVAP/DAPI and **C.** GFAP staining of whole brain sections, and magnification of two areas (close-up 1 - yellow rectangle, close-up 2 - blue rectangle) of the U87 and WK1 mouse models.

Table S1. Values of mean K_{trans} and mean K_{ep} in the CE tumor VOI for each subject in the study.

Group	Subject ID	K_{trans} [min^{-1}]	K_{ep} [min^{-1}]
