

A**B****C**

Figure S1. Effects of NLRP3 inflammasome on GAS muscle function after denervation. (A) The visualized diagram for force measurement in mice after denervation. (B) The force loss of the GAS muscles at indicated time points after denervation. (C) The amount of force loss in GAS muscles after denervation in each group. Data are expressed as mean \pm SD. n = 6 per group. * $p < 0.05$, ** $p < 0.01$, ns $p > 0.05$.
